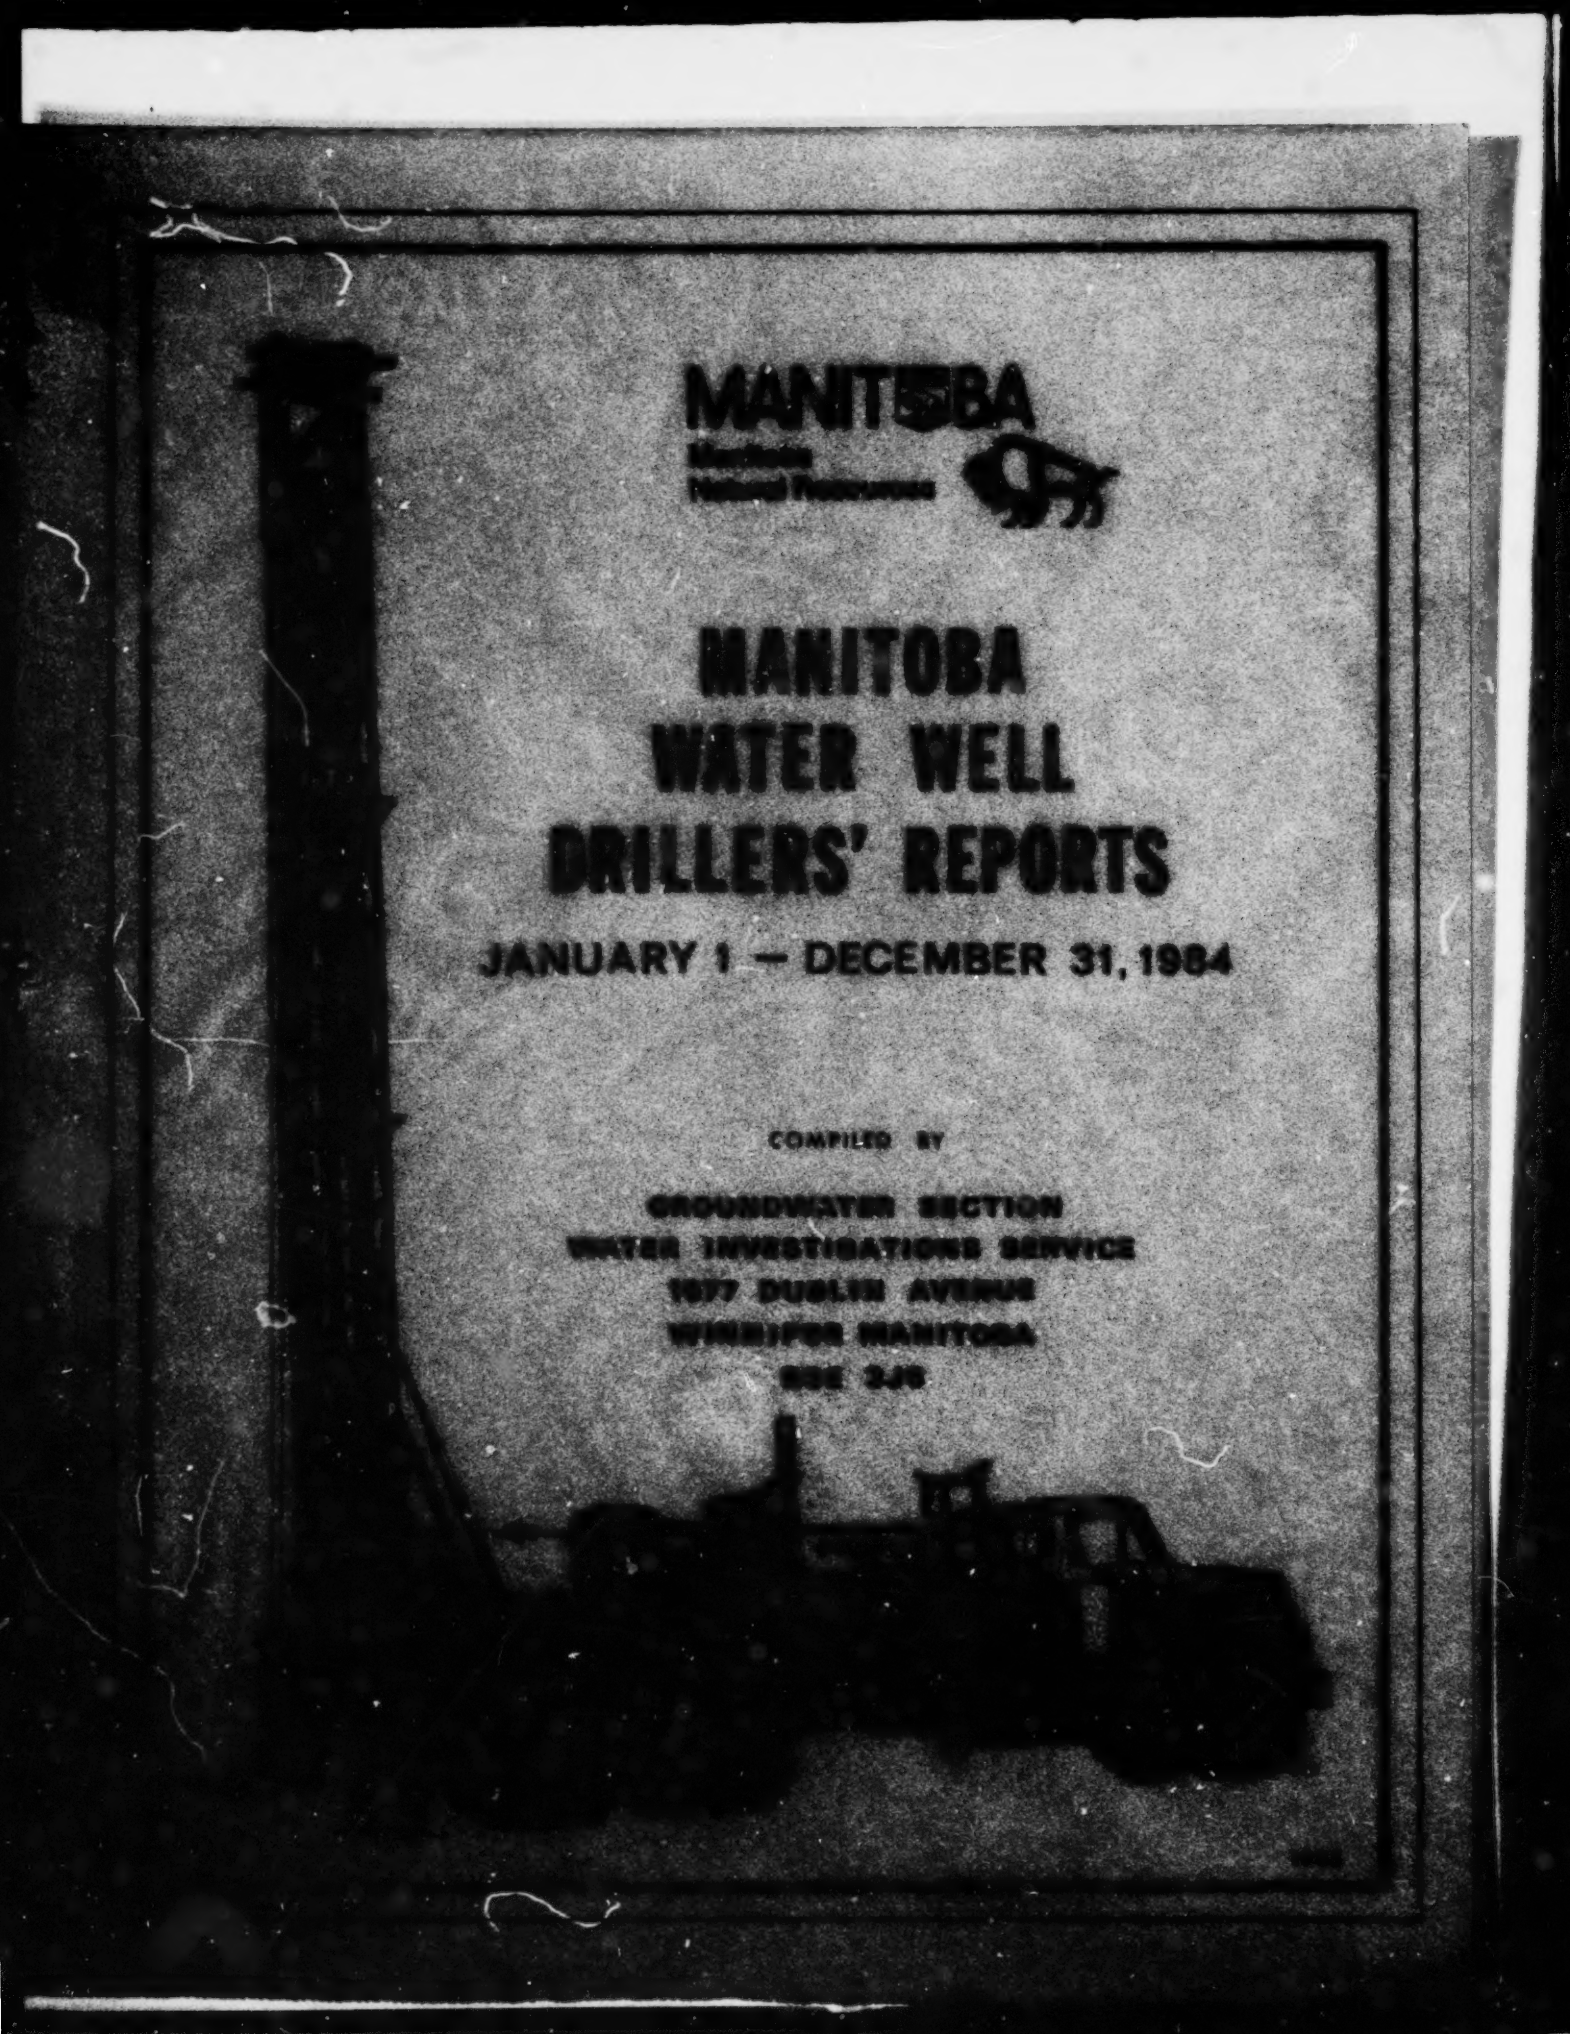
MANITOBA WATER WELL DRILLERS' REPORTS

JANUARY 1 — DECEMBER 31, 1984

COMPILED BY

GROUNDWATER SECTION
WATER INVESTIGATIONS SERVICE
1577 DUBLIN AVENUE
WINNIPEG MANITOBA
R3E 3J5



INTRODUCTION

The well records have been compiled from drillers' reports submitted to this Branch under the provisions of the Ground Water and Water Well Act.

Statistics about well drilling in Manitoba in 1984 are listed on page iii.

The locations of wells are described by:

(a) quarter section, section, township, range;

(b) river lot and parish or settlement.

For an outline of listing of the records see Index.

Flowing wells are indicated by a "+" sign before the static level.

The well logs are reproduced essentially as reported by the drillers. No attempt has been made to make geological interpretation of the well logs.

The water of a well may be considered potable unless it is classified as salty, alkaline, etc., in the Well Log and Remarks column.

To save space, the following abbreviations of often-used owners' names have been used in the compilation.

L.G.D.	-	Local Government District
M.W.S.B.	-	Manitoba Water Services Board
M.H.R.C.	-	Manitoba Housing and Renewal Corporation
PARKS BRANCH	-	Parks Branch, Department of Natural Resources
W.R.B.	-	Water Resources Branch, Department of Natural Resources

The data in the records are coded as follows:

(a) Well Use column -

P - production
T - test well
R - recharge
O - observation well

(b) Water Use column -

D - domestic
L - livestock
M - municipal
I - industrial
IR - irrigation
A - air conditioning
O - other

(c) Type column -

T & C	- thread & coupling
SL Pipe	- slotted pipe
Perf. Pipe	- perforated pipe

(d) Materials column -

S.S.	- stainless steel
S. Bronze	- stainless bronze
Silica S.	- silica sand
Quartz S.	- quartz sand
Quartz Gr.	- quartz gravel
Washdn. F.	- washdown fitting
Silica R.	- silica rock

The following abbreviations of drilling contractors' names have been used:
